

PUBLICATIONS ORIGINALES

ANNEE 1992

1. Brice A, Ravisé N, **Stevanin G**, Gugenheim M, Bouche P, Penet C, Agid Y and the CMT research group. Duplication within chromosome 17p11.2 in 12 families of French ancestry with Charcot-Marie-Tooth disease type 1a. *J Med Genet*, 1992; 29:807-812.

ANNEE 1993

2. Brice A, Boch AL, **Stevanin G**, Khati C, Dubois B, Agid Y and the French Alzheimer's disease collaborative study group. Absence of amyloid precursor protein gene mutation (APP717 : Val->Ile) in 85 cases of early onset Alzheimer's disease. *J Neurol Neurosurg Psychiatry*, 1993; 56:112-113.
3. Khati C, **Stevanin G**, Durr A, Chneiweiss H, Belal S, Seck A, Cann H, Brice A and Agid Y. Genetic heterogeneity of autosomal dominant cerebellar ataxia type I : clinical and genetic analysis of ten french families. *Neurology*, 1993; 43:1131-1137.
4. Gispert S, Twells R, Orozco G, Brice A, Weber J, Heredero L, Scheufler K, Allotey R, Nothers C, Hillermann C, Lunke A, Khati C, **Stevanin G**, Hernandez C, Margarino C, Klockgether T, Durr A, Chneiweiss H, Enczmann J, Farral M, Beckmann J, Mullan M, Wernet P, Agid Y, Freund HJ, Williamson R, Auburger G, Chamberlain S. Chromosomal assignment of the second (cuban) locus for autosomal dominant cerebellar ataxia (SCA2) to human chromosome 12q23-24.1. *Nature Genet* 1993; 4:295-299.
5. **Stevanin G**, Chneiweiss H, Leguern E, Ravisé N, Dürr A, Penet C, Agid Y and Brice A. Genetic heterogeneity of autosomal dominant cerebellar ataxia type I: evidence for the existence of a third locus. *Hum Mol Genet*, 1993; 2:1483-1485.
6. Cancel G, Khati C, **Stevanin G**, Pages JC, Agid Y, Brice A and Cann HM. EDN1 is not a candidate gene for spinal cerebellar ataxia 1 (SCA1). *Hum Mol Genet*, 1993; 2:1477-1479.
7. Le réseau français d'étude de la Maladie d'Alzheimer. Recherche de mutations du précurseur de la protéine beta-amyloïde dans des formes précoces de Maladie d'Alzheimer. *Revue Neurol (Paris)*, 1993; 149:528-531.
8. Durr A, **Stevanin G**, Jedinak P, Penet C, Agid Y and Brice A. Familial essential tremor and idiopathic torsion dystonia are different genetic entities. *Neurology* 1993; 43:2212-2214.

ANNEE 1994

9. Durr A, Chneiweiss H, Khati C, **Stevanin G**, Cancel G, Feingold J, Agid Y and Brice A. Phenotypic variability in autosomal dominant cerebellar ataxia type I is unrelated to genetic heterogeneity. *Brain* 1993; 116:1497-1508.
10. **Stevanin G**, Le Guern E, Ravisé N, Chneiweiss H, Dürr A, Cancel G, Vignal A, Boch AL, Ruberg M, Penet C, Pothin Y, Lagroua I, Haguenaou M, Rancurel G, Weissenbach J, Agid Y and Brice A. A third locus for autosomal dominant cerebellar ataxia type I maps to chromosome 14q24.3-qter; evidence for the existence of a fourth locus. *Am J Hum Genet* 1994a; 54:11-20.
11. Cancel G, Dürr A, **Stevanin G**, Chneiweiss H, Duyckaerts C, Serdaru M, de Toffol B, Agid Y and Brice A. Is DRPLA also linked to 14q? *Nature Genet* 1994; 6:8.
12. Benomar A, Le Guern E, Dürr A, Ouhabi H, **Stevanin G**, Yahyaoui M, Agid Y and Brice A. Autosomal dominant cerebellar ataxia with retinal degeneration (ADCA type II) is genetically different from ADCA type I. *Ann Neurol* 1994; 35:439-444.
13. Belal S, Cancel G, **Stevanin G**, Hentati F, Khati C, Ben Hamida C, Auburger G, Agid Y, Ben Hamida M and Brice A. Clinical and genetic analysis of a large Tunisian family with ADCA type I linked to the SCA2 locus. *Neurology* 1994; 44:1423-1426.
14. **Stevanin G**, Sousa PS, Cancel G, Dürr A, Dubourg O, Nicholson GA, Weissenbach J, Jardim E, Agid Y, Cassa E and Brice A. The gene for Machado-Joseph disease maps to the same 3 cM interval as the spinal cerebellar ataxia 3 gene on chromosome 14q. *Neurobiol Dis* 1994b; 1:79-82.

ANNEE 1995

15. **Stevanin G**, Cancel G, Dürr A, Chneiweiss H, Dubourg O, Cann HM, Weissenbach J, Agid Y and Brice A. The gene for spinal cerebellar ataxia 3 (SCA3) is located in a region of approximately 3 cM on chromosome 14q24.3-q32.2. *Am J Hum Genet* 1995a; 56:193-201.
16. Fontaine B, Rime C-S, Hazan J, Dürr A, **Stevanin G**, Penet C, Reboul J, Agid Y, Lyon-Caen O, Baumann N, Weissenbach J and Brice A. Exclusion of the candidate locus FSP1 in 6 families with adult-onset autosomal dominant spastic paraplegia. *Neuromus Dis* 1995; 5:11-17.
17. Dubourg O, Dürr A, Cancel G, **Stevanin G**, Chneiweiss H, Penet C, Agid Y and Brice A. Analysis of the SCA1 CAG repeat in a large number of families with dominant ataxia: clinical and molecular correlations. *Ann Neurol* 1995; 37:176-180.

18. Benomar A, Krols L, **Stevanin G**, Cancel G, LeGuern E, David G, Ouhabi H, Martin J-J, Dürr A, Zaim M, Ravisé N, Busque C, Penet C, VanRegemorter N, Weissenbach J, Yahyaoui M, Chkili T, Agid Y, VanBroeckhoven C and Brice A. The gene for autosomal dominant cerebellar ataxia with pigmentary macular dystrophy maps to chromosome 3p12-p21.1. *Nature Genet* 1995; 10:84-88.
19. **Stevanin G**, Cassa E, Cancel G, Abbas N, Dürr A, Jardim E, Agid Y, Sousa P, Brice A. Characterization of the unstable expanded CAG repeat in the MJD1 gene in 4 Brazilian families of Portuguese descent with Machado-Joseph disease. *J Med Genet* 1995b; 32:827-830.
20. Dürr A, **Stevanin G**, Cancel G, Abbas N, Agid Y, Feingold J, Brice A. Gender equality in Machado-Joseph disease. *Nature Genet* 1995; 11:118.
21. Cancel G, Abbas N, **Stevanin G**, Dürr A, Chneiweiss H, Néri C, Duyckaerts C, Penet C, Cann HM, Agid Y and Brice A. Marked phenotypic heterogeneity associated with expansion of a CAG repeat sequence at the spinocerebellar ataxia 3 / Machado-Joseph disease locus. *Am J Hum Genet* 1995; 57:809-816.
22. Gispert S, Lunkes A, Santos N, Orozco G, Ha-Hao D, Ratzlaff T, Aguiar J, Torrens I, Heredero L, Brice A, Cancel G, **Stevanin G**, Vernant JC, Dürr A, Lepage-Lezin A, Belal S, Ben-Hamida M, Pulst S, Rouleau G, Weissenbach J, LePaslier D, Kucherlapati R, Montgomery K, Fukui K, Auburger G. Localisation of the candidate gene Damino Acid Oxidase outside the refined 1 centiMorgan region of spinocerebellar ataxia 2 (SCA2). *Am J Hum Genet* 1995; 57:972-975.
23. Cancel G, **Stevanin G**, Dürr A, Chneiweiss H, Penet C, Pothin Y, Agid Y and Brice A. SCA2 is not a major locus for French autosomal dominant cerebellar ataxia type I families. *Am J Med Genet* 1995; 60:382-385.
24. **Stevanin G**, Cancel G, Didierjean O, Dürr A, Abbas N, Cassa E, Feingold J, Agid Y, Brice A. Linkage disequilibrium at the Machado-Joseph disease / spinocerebellar ataxia 3 locus: evidence for a common founder effect in French and Portuguese-Brazilian families as well as a second ancestral Portuguese-Azorean mutation. *Am J Hum Genet* 1995c; 57:1247-1250.
25. Dubourg O, Dürr A, Chneiweiss H, **Stevanin G**, Cancel G, Penet C, Agid Y et Brice A. La forme ataxo-choréique de DRPLA existe t-elle en Europe : recherche de la mutation dans 120 familles. *Rev Neurol (Paris)* 1995;11:657-660.
26. Trottier Y, Lutz Y, **Stevanin G**, Imbert G, Devys D, Cancel G, Saudou F, Weber C, David G, Tora L, Agid Y, Brice A, Mandel J-L. Polyglutamine expansion as a pathological epitope detected in Huntington's disease, in spinocerebellar ataxia 1 and 3 and two additional cerebellar ataxias. *Nature* 1995; 378:403-405.
27. Dürr A, Smadja D, Cancel G, Lezin A, **Stevanin G**, Mikol J, Bellance R, Buisson GG, Chneiweiss H, Dellanave J, Agid Y, Brice A, Vernant JC. Autosomal dominant cerebellar ataxia type I in Martinique (French West Indies): clinical and neuropathological analysis of 53 patients from three unrelated SCA2 families. *Brain* 1995;118:1573-1581.

ANNEE 1996

28. Lindblad K, Lunkes A, Maciel P, **Stevanin G**, Zander C, Klockgether T, Ratzlaff T, Brice A, Rouleau G, Hudson T, Auburger G, Schalling M. Mutation detection in Machado-Joseph disease using Repeat Expansion Detection. *Molecular Medicine* 1996;2:77-85.
29. Lezin A, Cancel G, **Stevanin G**, Smadja D, Vernant JC, Dürr A, Martial J, Buisson GG, Bellance R, Chneiweiss H, Agid Y, Brice A. Autosomal dominant cerebellar ataxia type I in Martinique (French West Indies): genetic analysis of three unrelated SCA2 families. *Hum Genet* 1996;97:671-676.
30. Dürr A, **Stevanin G**, Cancel G, Duyckaerts C, Abbas N, Didierjean O, Chneiweiss H, Benomar A, Lyon-Caen O, Julien J, Serdaru M, Penet C, Agid Y, Brice A. Spinocerebellar ataxia 3 and Machado-Joseph disease: clinical, molecular and neuropathological features. *Ann Neurol* 1996; 39:490-499.
31. Igarashi S, Takiyama Y, Cancel G, Rogaeva AE, Sasaki H, Wakisaka A, Zhou Y-X, Takano H, Endo K, Sanpei K, Oyake M, Tanaka H, **Stevanin G**, Abbas N, Dürr A, Rogaev EI, Sherrington R, Tsuda T, Ikeda M, Cassa E, Nishizawa M, Benomar A, Julien J, Weissenbach J, Wang G-X, Agid Y, St George-Hyslop P, Brice A, Tsuji S. Intergenerational instability of the CAG array of the gene for Machado-Joseph disease (MJD1) is affected by the genotype of the normal chromosome: implications for the molecular mechanisms of the instability of the CAG repeat. *Hum Mol Genet* 1996;5:923-932.
32. Lindblad K, Savontaus M-L, **Stevanin G**, Holmberg M, Digre K, Zander C, Ehrsson H, David G, Benomar A, Nikoskelainen E, Trottier Y, Holmgren G, Ptacek LJ, Anttinen A, Brice A, Schalling M. An expanded CAG repeat sequence in spinocerebellar ataxia type 7. *Genome Research* 1996;6:965-971.
33. David G, Giunti P, Abbas N, Coullin P, **Stevanin G**, Horta W, Gemmill R, Weissenbach J, Wood N, Cunha S, Drabkin H, Harding AE, Agid Y, Brice A. The gene for ADCA type II is located in a 5 cM region in 3p12-p13: Genetic and physical mapping of the SCA7 locus. *Am J Hum Genet* 1996;59:1328-1336.
34. **Stevanin G**, Trottier Y, Cancel G, Dürr A, David G, Didierjean O, Bürk K, Imbert G, Saudou F, Abada M, An I, Benomar A, Abbas N, Klockgether T, Grid D, Agid Y, Mandel J-L, Brice A. Scanning for proteins with polyglutamine expansions in autosomal dominant cerebellar ataxias. *Hum Mol Genet* 1996;5:1887-1892.
35. Imbert G, Saudou F, Yvert G, Devys D, Trottier Y, Garnier J-M, Weber C, Mandel J-L, Cancel G, Abbas N, Dürr A, Didierjean O, **Stevanin G**, Agid Y, Brice A. Cloning of the gene for spinocerebellar ataxia 2 reveals

a locus with high sensitivity to expanded CAG/glutamine repeats and high instability. *Nature Genet* 1996;17:285-291.

ANNEE 1997

36. Krols L, Martin J-J, David G, Van Regemorter N, Benomar A, Löfgren A, **Stevanin G**, Dürr A, Brice A, Van Broeckhoven C. Refinement of the locus for autosomal dominant cerebellar ataxia type II to chromosome 3p21.1-14.1. *Hum Genet* 1997;99:225-232.
37. Cancel G, Dürr A, Didierjean O, Imbert G, Bürk K, Lezin A, Belal S, Benomar A, Abada-Bendib M, Vial C, Guimaraes J, Chneiweiss H, **Stevanin G**, Yvert G, Abbas N, Saudou F, Lebre A-S, Yahyaoui M, Hentati F, Vernant J-C, Klockgether T, Mandel J-L, Agid Y, Brice A. Molecular and clinical correlations in spinocerebellar ataxia 2 : a study of 32 families. *Hum Mol Genet* 1997;6:709-715.
38. Bürk K, **Stevanin G**, Didierjean O, Cancel G, Trottier Y, Skajel M, Abele M, Brice A, Dichgans J, Klockgether T. Clinical and genetic analysis of three German kindreds with autosomal dominant cerebellar ataxia type I linked to the SCA2 locus. *J Neurol* 1997;244:256-261.
39. **Stevanin G**, Lebre A-S, Mathieux C, Cancel G, Abbas N, Didierjean O, Dürr A, Trottier Y, Agid Y, Brice A. Linkage Disequilibrium Between the Spinocerebellar Ataxia 3/Machado-Joseph Disease Mutation and Two Intragenic Polymorphisms, One of Which Affects the Stop Codon (X359Y). *Am J Hum Genet* 1997;60:1848-1552.
40. Schürhoff F, **Stevanin G**, Trottier Y, Bellivier F, Mouren-Siméoni M-C, Brice A, Leboyer M. A preliminary study on early onset schizophrenia and bipolar disorder : large polyglutamine expansions are not involved. *Psychiatry Res* 1997;72:141-144.
41. Bürk K, Fetter M, Skajel M, Laccone F, **Stevanin G**, Dichgans J, Klockgether T. Saccade velocity in idiopathic and autosomal dominant cerebellar ataxia. *J Neurol Neurosurg Psychiatry* 1997;62:662-664.
42. David G, Abbas N, **Stevanin G**, Dürr A, Yvert G, Cancel G, Weber C, Imbert G, Saudou F, Antoniou E, Drabkin H, Giunti P, Benomar A, Ruberg M, Agid Y, Mandel J-L, Brice A. Cloning of the gene for autosomal dominant cerebellar ataxia with progressive macular dystrophy (SCA7) reveals a highly unstable CAG repeat expansion. *Nature Genet* 1997;17:65-70.
43. Gourfinkel-An I, Cancel G, Trottier Y, Devys D, Tora L, Lutz Y, Imbert G, Saudou F, **Stevanin G**, Agid Y, Brice A, Mandel J-L, Hirsch E. Differential distribution of the normal and mutated forms of Huntingtin in the human brain. *Ann Neurol* 1997;42:712-719.
44. **Stevanin G**, Dürr A, David G, Didierjean O, Lebre A-S, Cancel G, Penet C, Agid Y, Brice A. Clinical and molecular features of spinocerebellar ataxia type 6. *Neurology* 1997;49:1243-1246.

ANNEE 1998

45. Cancel G, Gourfinkel-An I, **Stevanin G**, Didierjean O, Abbas N, Hirsch E, Agid Y, Brice A. Somatic mosaicism of the CAG repeat expansion in spinocerebellar ataxia type 3/Machado-Joseph disease. *Hum Mut* 1998; 11 :23-27.
46. David G, Dürr A, **Stevanin G**, Cancel G, Abbas N, Benomar A, Belal S, Lebre A, Abada-Bendib M, Grid D, Holmberg M, Yahyaoui M, Hentati F, Chkili T, Agid Y, Brice A. Molecular and clinical correlations in autosomal dominant cerebellar ataxia with progressive macular dystrophy (SCA7). *Hum Mol Genet* 1998;7:165-170.
47. Lyoo C-H, Hur K, Choi Y-C, Lee S-C, **Stevanin G**, David G, Brice A, Lee M-S. CAG repeat expansion in SCA7 in Korean families presenting clinical features compatible with ADCA type II. *J Kor Neurol Ass* 1998;16:341-352.
48. **Stevanin G**, Giunti P, David G, Belal S, Dürr A, Wood N, Brice A. De novo expansion on intermediate alleles in spinocerebellar ataxia 7. *Hum Mol Genet* 1998;7:1809-1813.
49. Takano H, Cancel G, Ikeuchi T, Lorenzetti D, Mawad R, **Stevanin G**, Didierjean O, Dürr A, Oyake M, Shimohata T, Sasaki R, Koide R, Igarashi S, Hayashi S, Takiyama Y, Nishizawa M, Tanaka H, Zoghbi H, Brice A, Tsuji S. Population genetics of dominantly inherited spinocerebellar ataxias with CAG repeat expansions in Japanese and Caucasian : tight association of the prevalence rates with the frequencies of the intermediate alleles. *Am J Hum Genet* 1998 ;63 :1060-1066.

ANNEE 1999

50. Dichgans M, Schöls L, Herzog J, **Stevanin G**, Weirich-Schwaiger H, Rouleau G, Bürk K, Klockgether T, Zühlke C, Laccone F, Riess O, Gasser T. Spinocerebellar ataxia type 6 : evidence for a strong founder effect among German families. *Neurology*, 1999 ;52 :849-851.
51. Didierjean O, Cancel G, **Stevanin G**, Dürr A, Bürk K, Benomar A, Lezin A, Belal S, Abada-Bendib M, Klockgether T, Brice A. Linkage disequilibrium at the SCA2 locus. *J Med Genet*, 1999; 36:415-417.
52. Giunti P, **Stevanin G**, Worth P, David G, Brice A, Wood NW. Molecular and clinical study of 18 families with ADCA type II: evidence for genetic heterogeneity and *de novo* mutation. *Am J Hum Genet* 1999; 64:1594-1603.

53. Grewal RP, Cancel G, Leeflang EP, Dürr A, McPeck MS, Draghinas D, Yao X, **Stevanin G**, Alnot M-O, Brice A, Arnheim N. French Machado-Joseph disease patients do not exhibit gametic segregation distortion: a sperm typing analysis. *Hum Mol Genet* 1999; 8:1779-1784.
54. **Stevanin G**, Herman A, Brice A, Dürr A. Clinical and MRI findings in spinocerebellar ataxia 5. *Neurology* 1999;53:1355-1357.
55. **Stevanin G**; David G; Dürr A; Giunti P; Benomar A; Abada-Bendib M; Lee M.S; Agid Y; Brice A. Multiple origins of the spinocerebellar ataxia 7 (SCA7) mutation revealed by linkage disequilibrium studies with closely flanking markers, including an intragenic polymorphism (G³¹⁴⁵TG/A³¹⁴⁵TG). *Eur J Hum Genet* 1999; 7:889-896.

ANNEE 2000

56. Zander C, Yuan Q-P, Lindblad K, **Stevanin G**, Dürr A, Davoine C-S, Hazan J, Fontaine B, Brice A, Schalling M. No evidence for long CAG/CTG repeats in families with spastic paraplegia linked to chromosome 2p21-24. *Neurosci Lett* 2000; 21:41-44.
57. **Stevanin G**, Herman H, Dürr A, Jodice C, Frontali M, Agid Y, Brice A. Are expansions at the SCA8 locus rare polymorphisms? *Nature Genet* 2000; 24:213.
58. Herman A*, **Stevanin G***, Netter J-C, Rascol O, Brassat D, Calvas P, Camuzat A, Yuan QP, Schalling M, Dürr A, Brice A (*co-first authors). Mapping of *spinocerebellar ataxia 13* to chromosome 19q13.3-q13.4 in a family with autosomal dominant cerebellar ataxia and mental retardation. *Am J Hum Genet* 2000, 67:229-235.
59. Illarioshkin SN, Ivanova-Smolenskaya IA, Rahmonov RA, Markova ED, **Stevanin G**, Brice A. Clinical and genetic study of familial essential tremor in an isolate of Northern Tajikistan. *Mov Disord* 2000, 15:1020-1023.

ANNEE 2001

60. Gaspar C, Lopes-Cendes I, Hayes S, Goto J, Arvidsson K, Dias A, Silveira I, Maciel P, Coutinho P, Lima M, Zhou YX, Soong BW, Watanabe M, Giunti P, **Stevanin G**, Riess O, Sasaki H, Hsieh M, Nicholson GA, Brunt E, Higgins JJ, Lauritzen M, Tranebjaerg L, Volpini V, Wood N, Ranum L, Tsuji S, Brice A, Sequeiros J, Rouleau GA. Ancestral Origins of the Machado-Joseph Disease Mutation: A Worldwide Haplotype Study. *Am J Hum Genet* 2001; 68:523-528.
61. Fujigasaki H, Martin JJ, De Deyn P, Camuzat A, Deffond D, **Stevanin G**, Dermaut B, Van Broeckhoven C, Dürr A, Brice A. CAG repeat expansion in the TBP gene causes autosomal dominant cerebellar ataxia. *Brain* 2001; 124:1939-1947.
62. Zander C, Takahashi J, El-Hachimi KH, Fujigasaki H, Albanese V, Lebre AS, **Stevanin G**, Duyckaerts C, Brice A. Similarities between spinocerebellar ataxia type 7 (SCA7) cell models and human brain : proteins recruited in inclusions and activation of caspase-3. *Hum Mol Genet* 2001;10:2569-2579.
63. Holmes SE, O'Hearn E, Rosenblatt A, Callahan C, Hwang HS, Ingersoll-Ashworth RG, Fleischer A, **Stevanin G**, Brice A, Potter NT, Ross CA, Margolis RL. A repeat expansion in the gene encoding junctophilin-3 is associated with Huntington's disease-like 2. *Nature Genet* 2001; 29 :377-378.

ANNEE 2002

64. Fujigasaki H, Tardieu S, Camuzat A, **Stevanin G**, LeGuern E, Matsuura T, Ashizawa T, Dürr A, Brice A. Spinocerebellar ataxia 10 in the French population. *Ann Neurol* 2002;51:408.
65. **Stevanin G**, Camuzat A, Holmes SE, Julien C, Sahloul R, Dodé C, Hahn-Barma V, Ross CA, Margolis RL, Dürr A, Brice A.. CAG/CTG repeat expansions at the Huntington's Disease-Like 2 locus are rare in Huntington's disease patients. *Neurology* 2002;58:965-967.
66. Aleman TS, Cideciyan AV, Volpe NJ, **Stevanin G**, Brice A, Jacobson SG. Spinocerebellar ataxia type 7 (SCA7) shows a cone-rod dystrophy phenotype. *Exp Eye Res* 2002;74:737-745.
67. Takahashi J, Fujigasaki H, Zander C, El Hachimi KH, **Stevanin G**, Dürr A, Lebre AS, Yvert G, Trottier Y, de Thé H, Hauw JJ, Duyckaerts C, Brice A. Two populations of neuronal intranuclear inclusions in SCA7 differ in size and promyelocytic leukaemia protein content. *Brain* 2002;125:1534-1543.

ANNEE 2003

68. **Stevanin G**, Fujigasaki H, Lebre AS, Camuzat A, Jeannequin C, Dodé C, Takahashi J, San C, Bellance R, Brice A, Dürr A. Huntington's disease like phenotype due to truncleotide repeat expansions in the TBP and JPH3 genes. *Brain* 2003 ; 126:1599-1603.
69. Takahashi J, Fujigasaki H, Iwabuchi K, Bruni AC, Uchihara T, El Hachimi KH, **Stevanin G**, Dürr A, Lebre AS, Trottier Y, de Thé H, Tanaka J, Hauw JJ, Duyckaerts C, Brice A. PML nuclear bodies and neuronal intranuclear inclusion in polyglutamine diseases. *Neurobiol Dis* 2003; 13 :230-237.

ANNEE 2004

70. **Stevanin G**, Bouslam N, Thobois S, Azzedine H, Ravoux L, Boland A, Schalling M, Broussolle E, Durr A, Brice A. Spinocerebellar ataxia with sensory neuropathy maps to the SCA25 locus on chromosome 2p. *Ann Neurol* 2004; 55:97-104.
71. Moreira MC, Klur S, Watanabe M, Németh AH, Le Ber I, Moniz JC, Tranchant C, Aubourg P, Tazir M, Schöls L, Pandolfo M, Schulz JB, Pouget J, Calvas P, Shizuka-Ikeda M, Shoji M, Tanaka M, Izatt L, Shaw CE, M'Zahem A, Dunne E, Bomont P, Benhassine T, Bouslam N, **Stevanin G**, Brice A, Guimarães J, Mendonça P, Barbot C, Coutinho P, Sequeiros J, Dürr A, Warter JM, Koenig M. Senataxin, the orthologue of a yeast RNA helicase, is mutated in ataxia-ocular apraxia 2. *Nature Genet* 2004; 36:225-227.
72. Leber I, Bouslam N, Rivaud-Péchoux S, Guimaraès J, Benomar A, Chamayou C, Goizet C, Moreira MC, Agid Y, Koenig M, **Stevanin G**, Brice A, Durr A. Frequency and phenotypic spectrum of AOA2 : a clinical and genetic study in 18 patients. *Brain* 2004;127:759-767.
73. **Stevanin G**, Hahn V, Lohmann E, Bouslam N, Gouttard M, Soumphonphakdy C, Welter ML, Ollagnon-Roman E, Lemainque A, Ruberg M, Brice A, Durr A. Mutation in the catalytic domain of PKC γ and extension of the phenotype associated with spinocerebellar ataxia 14. *Arch Neurol* 2004;616:1242-1248.
74. **Stevanin G**, Durr A, Dussert C, Penet C, Brice A. Mutations in the FGF14 gene are not a major cause of spinocerebellar ataxia in Caucasians. *Neurology* 2004;63:936.
75. Durr A, Camuzat A, Colin E, Tallaksen C, Hannequin D, Coutinho P, Fontaine B, Rossi A, Gil R, Rouselle C, Ruberg M, **Stevanin G**, Brice A. Atlastin1 mutations are frequent in young onset autosomal dominant spastic paraplegia. *Arch Neurol* 2004;61:1867-1872.

ANNEE 2005

76. Bouslam N, Benomar A, Azzedine A, Bouhouche A, Namekawa M, Klebe S, Charon C, Durr A, Ruberg M, Brice A, Yahyaoui M, **Stevanin G**. Mapping of a new form of pure autosomal recessive spastic paraplegia (SPG28) to chromosome 14q. *Ann Neurol* 2005;57:567-571.
77. Van de Warrenburg BPC, Hendricks H, Durr A, Van Zuijlen MCA, **Stevanin G**, Camuzat A, Sinke RJ, Brice A, Kremer BPH. Age at onset variance analysis in spinocerebellar ataxias: a study in a large Dutch-French cohort. *Ann Neurol* 2005;57:505-512.
78. Ribai P, **Stevanin G**, Trefouret S, Nelson I, Soumphonphakdy C, Pouget J, Durr A, Brice A. Extension of the SPG26 phenotype in a Spanish family and refinement of its locus on chromosome 12. <http://jmg.bmjournals.com/cgi/eletters/42/1/80?ck=nck#189>. *J Med Genet* 2005; e-letter (7 June 2005).
